One sitting from “hello” to live: voice-first advisor, one price, minutes-long KYC, live tracker

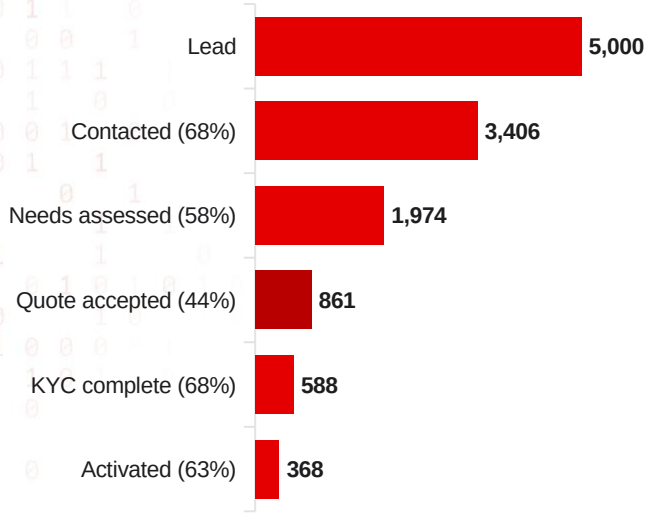

YTL Hackathon 2026 · Enterprise Track A

Team: Team Ace
Leader Name: Jayant Batra

Platform Partner unstop

Funnel & root causes: 4,632 of 5,000 leads leak, from five fixable causes

7.4% lead → live	**17.6 d** lead → live
₹15,053 CAC / activation	**3×** status chases

	Root cause	Evidence (leads)	Lost	Fix
1	**Sales needs a physical visit**	No time for visit 531 · visit not scheduled 296 · only wanted a mobile plan 280	1,107	Voice/chat advisor, SIM-only fast path
2	**Quote is slow, complex, not need-fitted**	Price 414 · competitor 207 · too complex 206 · too slow 179 · 87% got a bundle ≠ ask	1,006	Instant need-based quote, one price
3	**Paper KYC, no pre-checks**	Missing doc 94 · paperwork 79 · signatory away 53 · mismatch 47 · 22 live on bad GSTIN	273	Registry + DigiLocker, OCR, e-sign
4	**No feasibility check, no visibility**	Install > 21 days 98 · not feasible 41 · 3 chase calls; churn 6% → 28%	220	Feasibility first, live tracker
5	**Low-intent / bad contact data**	Unreachable 805 · wrong number 319 · not interested 470	1,594	Owner-initiated, verified mobile, scored follow-up

Source: smb_leads.csv (5,000 synthetic leads, Apr–Jun 2026). Steepest step: needs → quote (44%). Each step takes 2–4 days of hand-offs.

Who first: professional offices and multi-site pay back fastest

Professional offices

Wave 1 · digital

Share of leads 25%
Activation 11.1%
6-mo churn 14%
CAC / activation ₹10,695
Avg bundle ₹6,796/mo
Payback 1.6 months

Multi-site businesses

Wave 1 · digital + expert

Share of leads 15%
Activation 11.0%
6-mo churn 11%
CAC / activation ₹15,614
Avg bundle ₹31,233/mo
Payback 0.5 months

Micro retail & services

Wave 2 · digital starter

Share of leads 54%
Activation 4.1%
6-mo churn 23%
CAC / activation ₹20,007
Avg bundle ₹2,505/mo
Payback 8.0 months

Small manufacturers

Expert-led

Share of leads 6%
Activation 12.8%
6-mo churn 8%
CAC / activation ₹15,324
Avg bundle ₹19,980/mo
Payback 0.8 months

Micro · Starter

Biz Fibre 100, Business Postpaid 299, Cloud POS & Billing, Secure Wi-Fi with Guest Network

₹2,296/mo
setup ₹3,500 · 12 mo · live ~5 d

Professional · Clinic Pro

Biz Fibre 100, Cloud CCTV ×2, Cloud Email & Office Suite ×8, Cloud Backup 1 TB, Endpoint Security ×8

₹3,688/mo
setup ₹3,600 · 12 mo · live ~5 d

Multi-site · Chain Connect

Biz Fibre 100 ×4, Business Postpaid 599 ×4, Cloud POS & Billing ×4, Cloud CCTV ×8, Backup 4G/5G Failover ×4, Secure Wi-Fi with Guest Network ×4

₹15,553/mo
setup ₹34,400 · 12 mo · live ~5 d

Manufacturer · Factory Secure

Internet Leased Line 100, Business Postpaid 599 ×3, Cloud Email & Office Suite ×10, Managed Firewall, Machine Monitoring IoT ×5

₹30,791/mo
setup ₹34,000 · 24 mo · live ~30 d

Payback = CAC ÷ avg monthly bundle (revenue months). Bundles priced by our engine on product_catalogue.csv.

Needs discovery without a salesperson: talk → one price → verify → track

1 Talk

Voice or chat, 11 Indian languages + English, auto-detected. 6 short questions.

2 One price

Need-based bundle with plain reasons; toggle add-ons, 12/24 months, cheaper options.

3 Verify

Consent → GSTIN + registry → DigiLocker → upload only what's missing → e-sign.

4 Track

8-stage tracker with ETA, WhatsApp updates, auto-escalation when late.

AI talks, rules decide

Owner voice / chat → **Advisor (LLM phrases only)** → **Rule engine eligibility · price** → **Catalogue 25 products**

- **Understands any language:** it gets answers like "thirty" or "लुधियाना" and picks up corrections. Our app decides the next question, not the AI.
- **No made-up prices:** if the AI mentions a price or time we didn't calculate, the reply is thrown away and rewritten.
- **Proof:** we checked all 368 past sales with our rules. They would have stopped 53 wrong products and 22 sales to businesses with cancelled GST.

WHY IT MATTERS: 87% of activated customers bought a bundle different from what they asked for. Our advisor recommends from stated needs only e.g. SIMs only if asked, 100 Mbps for ≤9 people per site, upsell max 2 optional add-ons.

Stack: Next.js · Bedrock Mantle (Kimi K2.5, Mumbai) · Sarvam STT/TTS · AWS Textract. Replay on smb_leads.csv.

Smart KYC in minutes: registry first, upload last, consent throughout

Consent per purpose → **GSTIN checksum + registry** → **Udyam registry** → **DigiLocker / Entity Locker** → **Upload only what's missing** → **Cross-checks + e-sign**

Specimen applicants: 7 of 12 verified, 5 blocked

K01	GSTIN cancelled in registry (certificate looks fine) + blank Udyam number
K05	Udyam certificate missing
K06	GSTIN fails checksum, 2 characters altered vs registry
K07	Legal name on certificate edited (≠ registry)
K11	Electricity bill 257 days old (> 90-day rule)

Digital Personal Data Protection Act, 2023

Consent: Separate, withdrawable consents: KYC, voice, expert hand-off, marketing (off by default).

Purpose limitation: KYC data used only for KYC/contract, never marketing.

Minimisation: Registry + DigiLocker first; images read in memory, never stored.

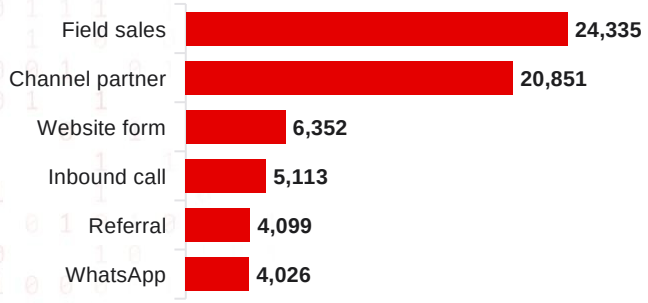

Retention: Fields for contract period; transcripts 30 days; non-buyers 90 days.

Rights: Privacy center: view, withdraw, download, delete.

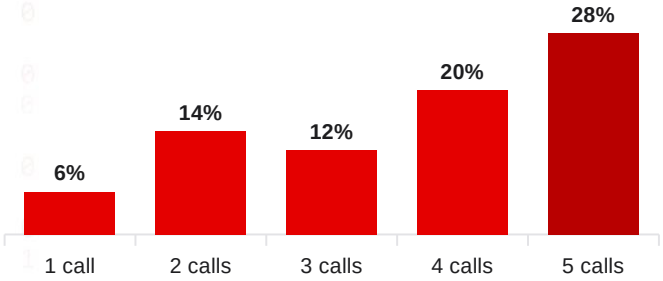

Specimen documents from kyc_documents/ (synthetic). DigiLocker and e-sign are simulated in the prototype; OCR by AWS Textract.

Experts work only what AI can't close, and nobody has to chase status

CAC per activation (₹) by source

6-month churn (%) by status-chase calls

1 Route

AI escalates on 7 triggers: price objection ×2, multi-site / manufacturer, not feasible, KYC failure, idle quote, low confidence, asks for a person.

2 Prioritise

Likelihood-to-buy score (logistic model, AUC 0.73; GSTIN +1.19 strongest). High → same day, medium → 24 h call, low → WhatsApp nurture.

3 Assign

Top-3 experts by distance, language, segment specialty, track record, load, offered in turn; manager override, reason shown.

4 Pay

70% on connection + 30% retention bonus at 6 months; clawback if churn < 3 months. Discounts only by manager, in 3 cases.

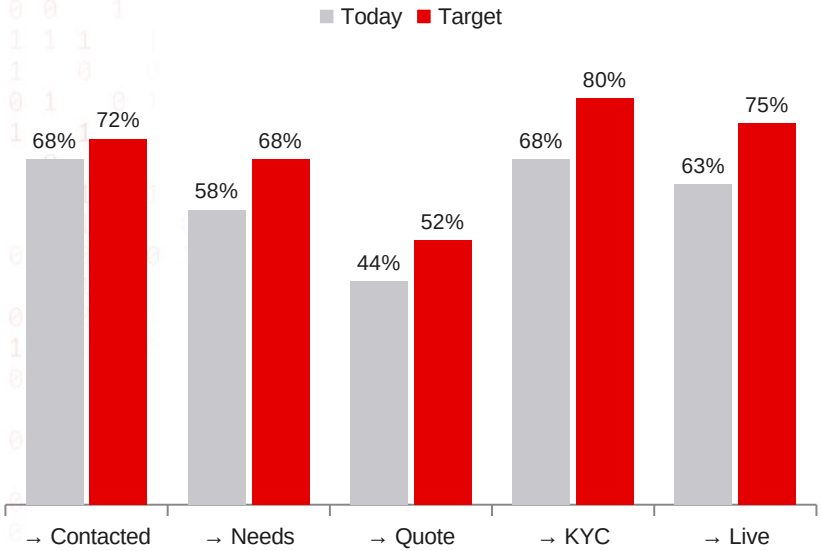

Tracker: what the owner sees

Placed | Paid | KYC | Feasibility | Technician | Install | Live | 1st bill

ETA = longest install in the bundle; late > 1 day → auto-escalation + WhatsApp before they ask. Partner leads churn 19% vs field 10%.

Source: smb_leads.csv. CAC = acquisition_cost_inr per lead source ÷ activations from it. Churn n = 34, 84, 137, 70, 43.

Business case: same 5,000 leads, ~764 activations instead of 368

Fixes per step: owner-initiated + verified number · no visit · instant need-based quote · registry/DigiLocker KYC · feasibility before checkout + tracker.

Per quarter of 5,000 leads	Today	Target
Activations / quarter	368	**~764**
Activation rate	7.4%	**15.3%**
New MRR / quarter	₹25,39,200	**₹52,71,600**
Annualised new revenue	₹3.0 Cr	**₹6.3 Cr**
CAC / activation	₹15,053	**≤ ₹5,000**
Payback (revenue months)	2.2	**0.7**

FOR THE OWNER: One bill, one number, live in days, a tier-2 clinic gets fibre, email ×8, backup, security and 2 CCTV for ₹3,688/mo.

Targets are proposals. MRR at median bundle ₹6,900/mo (mean ₹12,351). CAC target: experts only on AI-routed leads.

How we'll measure it, roll it out and de-risk it

Success metrics

Lead → activation	7.4%	≥ 15%
Days lead → live	17.6	≤ 7
CAC / activation	₹15,053	≤ ₹5,000
6-month churn	15.2%	≤ 10%
Status chases / customer	3	< 1

Also tracked: share closed by AI alone, products per customer (4.49 today), discount rate, NPS.

Rollout

1. **0–3 mo · Pilot**
   2 tier-2 cities, professional offices + multi-site; partners onboarded as Local Accel Experts.
2. **3–6 mo · Wave 1**
   All tier-1/2 cities for wave-1 segments; voice in 11 languages; DigiLocker live.
3. **6–12 mo · Wave 2**
   Micro digital starter (WhatsApp/web-led), manufacturers expert-led; national.

Risks → mitigation

AI says something wrong
Rules pick products/prices; number & promise guard

Regional voice quality
Chat fallback; questions fixed in code

Partners resist
Paid on connection; AI sends them warm leads

Data residency / DPDP
Mumbai region; consent + retention limits

Fibre not feasible
Check before checkout; 5G AirFiber fallback

Baselines: smb_leads.csv. Targets and rollout are proposals.

Solution architecture: voice-first advisor where AI talks and rules decide

AI talks, rules decide • Next.js + Node.js voice relay • Bedrock & Textract (ap-south-1) • Sarvam speech • Cloudflare Tunnel

1. Clients browser

Owner app
business owner
Chat | Quote | KYC | Track

Voice mode
talk like a call
11 languages | Barge-in

Expert app
Local Accel Expert
Leads | Score | Assist

Manager tab
operations
Approvals | Override

2. Edge network

Cloudflare Tunnel
edge network

- ✓ TLS: HTTPS + WSS
- ✓ No open ports on host
- ✓ One public URL

Gateway :8080
routing (+ optional code)

- ✓ Optional access code
- ✓ /voice → :3001, rest → :3100

3. Application Node.js · TypeScript

Next.js 16 · :3100
UI + API routes: /chat /kyc /order /leads

Voice relay · :3001
WebSocket · barge-in · echo guard

Decision core the brain: every product, price & KYC decision

- Fact reader
- Next question
- Rule engine
- Pricing
- Reply guard
- KYC checks

Routing & propensity | Orders & tracker | Consent & privacy

4. AI & data managed / external

Amazon Bedrock (ap-south-1)
Mantle API · Kimi K2.5 · facts + replies

Sarvam speech
Saaras v3 STT · Bulbul v3 TTS · auto language

AWS Textract (ap-south-1)
OCR for KYC docs, in memory

Data & business stores

Registries
GSTIN 3,534 · Udyam 2,723

Catalogue
25 products · model

Session store
profiles · consents · orders

DigiLocker
+ e-sign (simulated)

Request flow (owner says: "I run a clinic in Kochi, 8 staff")

1. **Owner speaks** — browser mic
2. **Tunnel + gateway** — → voice relay
3. **Sarvam STT** — ~0.2 s, auto language
4. **Decision core** — facts → rules → price
5. **Kimi phrases** — guarded, 0.3–1 s
6. **Sarvam TTS** — owner hears, can interrupt

Deployment

- ✓ EC2 t3a.small, Mumbai, via Cloudflare Tunnel
- ✓ No inbound ports; keys in AWS SSM + IAM role
- ✓ Push to GitHub → live in ~2 min
- ✓ Next: managed DB + object storage

Why this design

- ✓ Prices & eligibility from rules, never the AI
- ✓ Voice or chat, 11 Indian languages
- ✓ India-region AI, DPDP-friendly
- ✓ Swap any model, rules stay

Privacy & security by design: collect less, keep less, show less

Collect
Consent per purpose first; registry / DigiLocker before uploads

Use
Only for the stated purpose; never KYC data for marketing

Store
Fields, not images; masked IDs; India region

Share
Expert sees name, business, area, plan, after one-tap consent

Delete
Auto-expiry + delete-my-data in the Privacy center

Data	Why we need it	Kept	Who sees it
Mobile number	Save one plan across voice, chat, expert	Until deleted	Owner; expert after consent
Business profile	Recommend and price the bundle	Contract / 90 d if no sale	Owner; expert (summary)
GSTIN · Udyam no.	Verify the business (KYC)	Contract period	Masked in UI, e.g. 32TT*******1ZW
KYC images	Read the fields (OCR)	Not stored, memory only	Nobody
Extracted KYC fields	Contract and compliance	Contract period	Operations (masked)
Voice audio	Understand what was said	Not stored	Speech processor only
Transcript	Continue the conversation	30 days	Owner; expert gets a summary
Consent log	Prove what was agreed, when	Kept as proof	Compliance

SECURITY CONTROLS

✓ No open ports (Cloudflare Tunnel); role views (owner / expert / manager)

✓ Keys only on the server; AWS calls signed (SigV4)

✓ OCR in memory; images never written to disk

✓ Identifiers masked in UI and logs; no personal data in app logs

✓ AI and hosting in AWS Mumbai (ap-south-1)

OWNER RIGHTS (DPDP ACT 2023)

View | Withdraw | Download | Delete

Grievance contact in the consent notice

Synthetic data only in the prototype. Processors (AWS, Sarvam) disclosed in the notice. Legal citations to be verified.
